

Photo-tarpaulins for your garage door!

The days of boring garage doors are numbered!

before

after

Garage billboards from style-your-garage.com come in six different sizes and 250 motifs. The door posters are ideal for single, multiple and large garages, irrespective of whether they have up-and-over, wing or sectional doors. Special motifs and unusual sizes can be individually manufactured.

Sponsored motifs are already available from 99 euros. Standard motifs are available from 139 euros (plus shipping costs). The garage billboards are supplied complete with fitting kit. For further information, please go to our website at www.style-your-garage.com.

Assembling instruction for Wall Stickers

before

after

• style-your-wall.com •

A short guide in pictures:

Slowly remove the first few centimetres of the backing film.

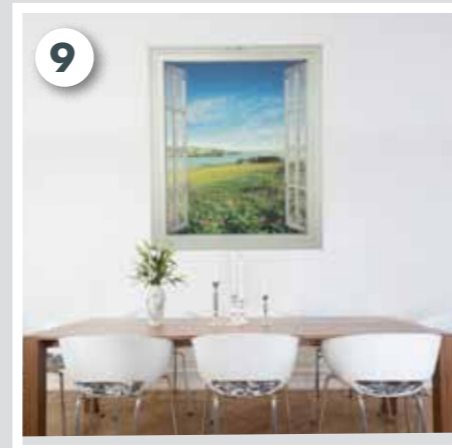

Press the first centimetres along the marked area on the wall.

You can use a plastic scraper to apply the decal more firmly.

Very important: press down the corners of the print firmly.

Now you can remove the backing film bit by bit.

Firmly press the decal onto the wall as you go along.

Smooth out all corners and edges again.

Finished!

Detailed installation instructions.

Dear Customer,

thank you very much for buying a wall decal! In order to make affixing your wall art as simple as possible, please read these instructions carefully.

For installation you will need:

A pencil, a metre stick or ruler and, if available, a plastic scraper.

Basics for affixing your wall art:

The wall surface to which the print is to be applied should be dry and free from dirt and dust before installation. (The wall should not have been painted in the previous 3-4 weeks.) We recommend that larger prints are applied by two people. A plastic scraper from our online shop guarantees simple application without any scratches.

Mark out the position.

Mark the desired position of the print in two places. This ensures that the print is mounted straight on the wall.

Alternatively, you could also use a spirit level to draw a horizontal line.

Remove backing film.

Carefully remove a few centimetres of the upper side of the backing film on the reverse of the decal and position the first centimetres of the wall art along the marked area on the wall.

Use the plastic scraper to press out the edges and corners of the print particularly firmly.

Now you can remove the backing paper bit by bit and apply the wall art to the wall as you go.

Smooth out the corners.

Once you have finished, use the plastic scraper to smooth out all corners of the print again. You're done!

The Style-Your-Wall team hopes you enjoy your wall decal

Caution!

Please note that the return of wall decals that we are not able to resell (i.e. if they have already been cut, damaged, creased or have already been affixed) causes major processing problems. Please read the return instructions section! We cannot guarantee

that the use and removal of the wall decal after use will not cause damage to the surface it is applied to. Possible damage particularly includes peeling of the surface

upon removal of the adhesive strip. Therefore it is essential to carry out a test in an inconspicuous place on the surface before affixing the adhesive strip.
